Talk to your accounting advisor before processing your books. If there are cancellations/refunds/sales/annulled invoices, the amount to be invested will be calculated and will be displayed. An invoice for \$ 365 is created for the permit from January 1, 2017 to December 31, 2017. Most of the Bricas worldwide recommend following this principle to obtain better reports. Assuming that the bill based on the day: the month of January is read - \$ 31.00 to be recognized, February - \$ 28.00 and so successively. Part B: June 13 - July 31 (the remaining part of the service permit). Every time the crimes are collected in Chargebee, they are counted in non-retrospective reports, even when the chosen accounting form for the site is retrospective. How should I use this report? Recognition of income for this part is done as usual. Get in touch with [protected email] to change non-retrospective. Monthly recognition is not compatible. With the non-retrospective accounting, when a new position is added that has everything or part of its service permit in the past, the reports of the last days are not altered. Income recognition report The income recognition report provides the real amount to be recognized for each month. Note that these reports are now available under accounting entry> Accounting reports Real data availability depends on the permit for which invoices were imported and can reach January 2011, the account summary report It is a monthly report of its sales, discounts, uncollectible debts, and reversions, which can be used for accounting purposes. The income of this party is currently recognized (June 13). You can download the report on the .CSV format. Support of multiple coins if it is operating in multiple coins, then Chargebee will show the details in the base currency and the currency in the the invoice is processed. The monthly income to be deferred is calculated per day or per millisecond depending on the billing mode<sup>3</sup> the site.
